# Sustainability Action Ideas, Ideas, Ideas

## **Ideas for Sustainable Action at YOUR School**

Looking for STUDENT actions to take to make your school more sustainable?

Want to see what other schools have done?

Want to avoid some of the pitfalls of implementing actions?

At the spring 2015 Y.E.S. Celebration of Sustainable Schools students from five schools presented what they have been doing to take action to make their school better and more sustainable.

Using a PowerPoint slides and explanation each of the 5 schools highlighted some of the activities they are doing.

A quick summary of the topics provided by each school shows some of the many ESD (Education for Sustainable Development) actions possible. In the first part all of the actions are arranged alphabetically with the name of the school(s) listed beside each action.

In the second part the actions for each school are summarized. Contact information for each school is included. Also included is access to the PowerPoint presentations made by the students.
