

Field Camp: Alternative Energy

- Learn about Alternative Energy!
- Observe a wind turbine installed on a school.
- Analyze data that is being generated by the turbine like wind speed, kilowatts generated and CO2 reductions.
- Learn about the tremendous growth in wind and solar power world-wide.
- Get hands-on by building your own small wind turbine.
- Learn how to gain support to purchase and install a wind turbine and solar cells for your own school or institution.
- Get informed and Get involved!

Location: Vincent Massey Collegiate for 2 days.
